**CMI Enterprises
Announces
NBT™ Marine Prep Kit**

CMI Enterprises, a market leader in the coated fabric industry serving the marine industry - recently introduced their NBT™ Marine - which provides superior clean-ability and protection in the vinyl product category.

Each boat featuring NBT™ Marine in its vinyl upholstery - comes equipped with a CMI Prep Kit. Featuring CMI's instructional hangtag, a 2 ounce bottle of their all purpose vinyl cleaner - V-Clean – as well as several NBT™ Marine Clean foil wipes.

The pioneering clean ability proves to be a key and vital asset. First in the manufacturing process, allowing difficult stains to be removed easily - secondly, the improved ability to clean stains that will not come out of standard marine vinyl allows dealers to offer value added services and products. The end result is long term ownership and product satisfaction by the boat owner!

NBT™ Marine forms a barrier against - and has an active "Nano" agent - that kills bacteria responsible for mildew and fungus growth. This "Nano" technology or agent is self-renewing. Its effectiveness is as powerful at the end of the upholstery fabric's life cycle as it is at its beginning.

For more information or to request samples on CMI Enterprises NBT™ Marine call 1-800-426-4826 Ext: 313 - visit www.cmi-nbt.com or email them directly at info@cmi-nbt.com .
